Math 3 Unit 7 Worksheet 1
Introduction to Circles

Name: _____
Date: _____ Per: _____

[1-7] Identify the center and radius for the circle. Sketch the circle and be sure to identify the scale being used.

1. $x^2 + y^2 = 49$

2. $x^2 + y^2 = 40$

3. $x^2 + y^2 = 11$

4. $(x + 4)^2 + (y - 7)^2 = 4$

5. $(x - 8)^2 + (y + 3)^2 = 80$

6. $x^2 + (y - 1)^2 < 144$

7. $(x + 5)^2 + y^2 \geq 225$

[8-11] Write the equation of the circle with the information given:

8. The circle is shifted from the origin 3 units left and 5 units up, with a radius of 3

9. The circle is shifted from the origin 12 units right and 8 units down, with a radius of 11

10. The circle is shifted from the origin 4 units down, with a radius of $3\sqrt{2}$.

11. The circle is shifted from the origin 5 units right, with a radius of $5\sqrt{3}$.

12. Is the point $(2, 4)$ inside, outside, or on the circle, $(x + 1)^2 + (y - 1)^2 = 16$? Justify your response.

13. Is the point $(5, -5)$ inside, outside, or on the circle, $(x + 1)^2 + (y + 2)^2 = 49$? Justify your response.

[14-19] Complete the square and write the trinomial as a perfect square. No decimals allowed.

14. $x^2 + 10x + \underline{\hspace{1cm}} = 3 + \underline{\hspace{1cm}}$ 15. $x^2 + 16x + \underline{\hspace{1cm}} = 0 + \underline{\hspace{1cm}}$ 16. $x^2 - 8x + \underline{\hspace{1cm}} = 5 + \underline{\hspace{1cm}}$

$(\hspace{1cm})^2 = \underline{\hspace{1cm}}$ $(\hspace{1cm})^2 = \underline{\hspace{1cm}}$ $(\hspace{1cm})^2 = \underline{\hspace{1cm}}$

17. $x^2 - 20x + \underline{\hspace{1cm}} = -2 + \underline{\hspace{1cm}}$ 18. $x^2 - 14x + \underline{\hspace{1cm}} = -4 + \underline{\hspace{1cm}}$ 19. $x^2 + 5x + \underline{\hspace{1cm}} = 1 + \underline{\hspace{1cm}}$

$(\hspace{1cm})^2 = \underline{\hspace{1cm}}$ $(\hspace{1cm})^2 = \underline{\hspace{1cm}}$ $(\hspace{1cm})^2 = \underline{\hspace{1cm}}$

20. $x^2 - \frac{1}{4}x + \underline{\hspace{1cm}} = 1 + \underline{\hspace{1cm}}$ 21. $y^2 + \frac{2}{3}y + \underline{\hspace{1cm}} = \frac{1}{3} + \underline{\hspace{1cm}}$

$(\hspace{1cm})^2 = \underline{\hspace{1cm}}$ $(\hspace{1cm})^2 = \underline{\hspace{1cm}}$

[22-24] Rewrite the following as $(x - a)^2 = b$ by completing the square.

22. $x^2 - 6x = 4$

23. $x^2 + 10x = 0$

24. $x^2 + 2x + 5 = 0$

Math 3 Unit 7 Worksheet 2
Converting Circles to Descriptive Form

Name: _____
 Date: _____ Per: _____

[1-6] Convert the following circle equations to descriptive form, $(x - h)^2 + (y - k)^2 = r^2$, by completing the square. Identify the center and the radius for each circle. Sketch the circle and be sure to label the scale being used.

1. $x^2 + y^2 - 10x - 4y + 20 = 0$

2. $x^2 + y^2 + 6x + 8y = 0$

3. $x^2 + y^2 + 13 = 8x - 2y$

4. $x^2 + y^2 + 33 = 14y - 4x$

5. $x^2 + y^2 - 12y - 12 \leq 0$

6. $x^2 + y^2 - 6x + 2y - 38 > 0$

[7-12] Convert the following circle equations to descriptive form, $(x - h)^2 + (y - k)^2 = r^2$, by completing the square. Identify the center and the radius for each circle.

7. $x^2 + y^2 - 7x + 6y - \frac{111}{4} = 0$

8. $x^2 + y^2 + 2x + 9y + \frac{37}{4} = 0$

9. $x^2 + y^2 + 8x + \frac{319}{25} = 0$

10. $x^2 + y^2 + 12x + 4y - 35 = 0$

11. $x^2 + y^2 + \frac{101}{4} = 16x - 5y$

12. $x^2 + y^2 + 11x - 16y + \frac{125}{4} = 0$

13. Show that the circle with equation $x^2 + y^2 + 74 = 6(y - 3x)$ is congruent to the circle with center at $(0, 0)$ and radius 4. *{i.e. Show the radius from the first circle is congruent to the radius from the second, and indicate the translation required to map the first circle to the second circle.}*

14. Show that the circle with equation $208 = x(x - 8) + y(y + 2)$ is a dilation image of the circle with center at $(4, -1)$ and radius 6. *{i.e. Show the center of the first circle is same as the center of the second, and find the ratio of dilation.}*

1. Graph the parabola $x^2 = 16y$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____
Focus: _____
Directrix: _____
Focal chord endpoints:
_____ and _____

2. Graph the parabola $y = \frac{1}{2}x^2$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____
Focus: _____
Directrix: _____
Focal chord endpoints:
_____ and _____

3. Graph the parabola $x^2 = -8y$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____
Focus: _____
Directrix: _____
Focal chord endpoints:
_____ and _____

4. Graph the parabola $y = \frac{1}{20}x^2$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

5. Graph the parabola $x^2 = -10y$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

6. Graph the parabola $y = -\frac{1}{14}x^2$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

For each of the following, use the formal definition of a parabola to derive the equation in focal width form.

7. the parabola with focus $(0,4)$ and directrix $y = -4$

8. the parabola with focus $(0,-12)$ and directrix $y = 12$

9. the parabola with focus $(0,10)$ and directrix $y = -10$

1. Graph the parabola $x = \frac{1}{4}y^2$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

2. Graph the parabola $y^2 = 2x$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

3. Graph the parabola $x = -\frac{1}{2}y^2$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

4. Graph the parabola $y^2 = 3x$. Find and graph the focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

[5-6] For each of the following, make a sketch and use the formal definition of a parabola to derive the equation in vertex (descriptive) form.

5. the parabola with focus (2,0) and directrix $x = -2$

6. the parabola with focus (-8,0) and directrix $x = 8$

[7-8] Complete the square for each circle to get the equation into standard/descriptive form. Identify center and radius.

7. $x^2 + y^2 - 20x + 6y - 16 = 0$

8. $x^2 + y^2 + 2x - 12y + 19 = 0$

1. Graph the parabola $(x + 3)^2 = 12(y - 1)$. Find and graph the vertex, focus, directrix, and focal chord endpoints.

Vertex: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

2. Graph the parabola $x = \frac{1}{2}(y - 2)^2 - 4$. Find and graph the vertex, focus, directrix, and focal chord endpoints.

Vertex: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

3. Graph the parabola $(x - 3)^2 = -8y$. Find and graph the vertex, focus, directrix, and focal chord endpoints.

Vertex: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

4. Graph the parabola $y = \frac{1}{20}x^2 + 4$. Find and graph the vertex, focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

5. Graph the parabola $(y + 2)^2 = -3(x - 1)$. Find and graph the vertex, focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

6. Graph the parabola $x = \frac{1}{10}(y + 1)^2 - 4$. Find and graph the vertex, focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

[7-9] For each of the following, make a sketch and use the formal definition of a parabola to derive the equation in descriptive form.

7. the parabola with focus (2,1) and directrix $x = -2$

8. the parabola with focus (-8,3) and directrix $y = -1$

9. the parabola with focus (1,2) and directrix $x = 3$

[10-11] Complete the square for each circle. Identify center and radius.

10. $2x^2 + 2y^2 + 24x - 16y - 40 = 0$

11. $x^2 + y^2 - 5x + 9y - \frac{15}{4} = 0$

Math 3 Unit 7 Worksheet 6
Converting Parabolas from General to Descriptive Form

Name: _____
Date: _____ **Per:** _____

For each equation, identify the direction the parabola opens (left, right, up or down); complete the square to write the equation in descriptive form; and indicate the parabola's vertex. Show all work!

1. $y = 2x^2 + 16x + 7$

Direction: _____ Vertex: _____

Equation: _____

2. $x = -5y^2 - 30y + 4$

Direction: _____ Vertex: _____

Equation: _____

3. $y = -\frac{1}{4}x^2 + 2x + 3$

Direction: _____ Vertex: _____

Equation: _____

4. $x = 2y^2 - 12y - 11$

Direction: _____ Vertex: _____

Equation: _____

5. $x = 4y^2 - 4y + \frac{7}{8}$

Direction: _____ Vertex: _____

Equation: _____

6. $y = \frac{1}{2}x^2 + 10x + 2$

Direction: _____ Vertex: _____

Equation: _____

7. $y = -3x^2 + 12x + 13$

Direction: _____ Vertex: _____

Equation: _____

8. $x = -3y^2 + 36y - 1$

Direction: _____ Vertex: _____

Equation: _____

9. $x = \frac{1}{3}y^2 + 8y + 120$

Direction: _____ Vertex: _____

Equation: _____

Vertex answers: Not In Order

(2, 25) (49, -3) (72, -12)

(-4, -25) (4, 7) $(-\frac{1}{8}, \frac{1}{2})$

(107, 6) (-10, -48) (-29, 3)

Selected answers for equations:

2. $x = -5(y + 3)^2 + 49$ opens left

6. $y = \frac{1}{2}(x + 10)^2 - 48$ opens up

8. $x = -3(y - 6)^2 + 107$ opens left

Math 3 Unit 7 Worksheet 7
Converting Parabolas and Circles to Descriptive Form

Name: _____
Date: _____ **Per:** _____

Show all appropriate work. {It might be possible to sketch and/or answer the follow-up information before converting to descriptive form. You may do this, but you must still do the algebraic manipulation needed to convert each to descriptive form.}

Descriptive form reminder: Parabola: $y = a(x - h)^2 + k$ or $x = a(y - k)^2 + h$ & Circle: $(x - h)^2 + (y - k)^2 = r^2$

[1-4]: A) Convert to descriptive form, B) sketch, and identify the following for each:
 C) Vertex D) Line/Axis of symmetry E) Focus F) Directrix G) Focal Chord Endpoints.

1) $(x - 3)^2 = 8(y - 5)$

Vertex: _____
 Line of Symmetry: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

2) $(y + 2)^2 = 4(x + 1)$

Vertex: _____
 Line of Symmetry: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

3) $y = -\frac{1}{4}x^2 + 5x - 20$

Vertex: _____
 Line of Symmetry: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

4) $x = \frac{1}{2}y^2 + 4y + 13$

Vertex: _____
 Line of Symmetry: _____
 Focus: _____
 Directrix: _____
 Focal chord endpoints:
 _____ and _____

[5-10]: A) Convert to descriptive form, B) sketch, and identify the following for each:
 C) Vertex D) Axis/Line of symmetry E) Number of x-intercepts F) Number of y-intercepts.

5) $(x - 5)^2 + 3(y - 2) = 0$

Vertex: _____

Line of Symmetry: _____

Number of x-intercepts: _____

Number of y-intercepts: _____

6) $x = -y^2 + 6y - 8$

Vertex: _____

Line of Symmetry: _____

Number of x-intercepts: _____

Number of y-intercepts: _____

7) $x = -3y^2 + 6y - 5$

Vertex: _____

Line of Symmetry: _____

Number of x-intercepts: _____

Number of y-intercepts: _____

8) $y = 2x^2 - 28x + 98$

Vertex: _____

Line of Symmetry: _____

Number of x-intercepts: _____

Number of y-intercepts: _____

9) $(y - 4)^2 = 12x$

Vertex: _____
 Line of Symmetry: _____
 Number of x-intercepts: _____
 Number of y-intercepts: _____

10) $(x + 4)^2 + 6(y + 2) = 0$

Vertex: _____
 Line of Symmetry: _____
 Number of x-intercepts: _____
 Number of y-intercepts: _____

[11-12]: A) Convert to descriptive form, B) sketch, and identify the following for each:
 C) Center D) Radius E) Number of x-intercepts F) Number of y-intercepts.

11) $x^2 + y^2 - 4x + 10y + 25 = 0$

Center: _____
 Radius: _____
 Number of x-intercepts: _____
 Number of y-intercepts: _____

12) $x^2 + y^2 + 8x - 2y + 5 = 0$

Center: _____
 Radius: _____
 Number of x-intercepts: _____
 Number of y-intercepts: _____

Math 3 Unit 7 Review Worksheet 1
Parabolas & Circles

Name: _____
Date: _____ **Per:** _____

1. Is the point $(3, 10)$ on the parabola, $y + 6 = (x + 1)^2$? Justify your response.

2. Is the point $(1, 4)$ inside, outside, or on the circle, $(x + 2)^2 + (y - 1)^2 = 16$? Justify your response.

3. Is the point $(-7, 5)$ inside, outside, or on the circle, $(x + 1)^2 + (y - 2)^2 = 49$? Justify your response.

4. What is the vertex and the length of the focal chord for the parabola, $x = \frac{1}{12}(y - 3)^2 - 1$?

Vertex: _____

Focal chord length: _____

5. What is the center and the length of the radius for the circle, $x^2 + y^2 + 8x - 6y - 3 = 0$?

Center: _____

Radius: _____

6. What is the vertex and the length of the focal chord for the parabola, $2x^2 - 12x - 5y - 12 = 0$?

Vertex: _____

Focal chord length: _____

7. Write the equation for the circle with center $(4, -1)$ and diameter $8\sqrt{2}$.

8. Using the distance formula and the definition of parabola, write the equation for the parabola in focal width form, $(y - k)^2 = 4c(x - h)$, that has a focus at the point $(-7, 2)$ and a directrix of $x = 1$.

9. Using the distance formula and the definition of parabola, write the equation for the parabola in vertex/descriptive form, $y = a(x - h)^2 + k$, that has a directrix of $y = 2$ and a focus at the point $(-1, 8)$.

10. Sketch the graph for the parabola, $x^2 = 2(y - 1)$. Find, graph, and identify the focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

11. Sketch the graph for the parabola, $x + 4 = \frac{1}{6}(y - 1)^2$. Find, graph, and identify the focus, directrix, and focal chord endpoints.

Vertex: _____

Focus: _____

Directrix: _____

Focal chord endpoints:

_____ and _____

12. Sketch the graph for the circle, $x^2 + y^2 + 2y - 10x + 8 = 0$. Find, graph, and identify the center and radius. How many times does the circle intersect with the x -axis? the y -axis?

Center: _____

Radius: _____

Number of x -intercepts: _____

Number of y -intercepts: _____

13. Sketch the graph for the parabola, $\frac{1}{4}x^2 - 4x + y + 15 = 0$. Find, graph, and identify the focus and the directrix. How many times does the parabola intersect with the x -axis? the y -axis?

Focus: _____

Directrix: _____

Number of x -intercepts: _____

Number of y -intercepts: _____

Math 3 Unit 7 Review Worksheet 2
Parabolas & Circles

Name: _____
Date: _____ **Per:** _____

Show all valid & appropriate work.

1. Find the center and the radius for the circle $x^2 + y^2 - 12x + 4y = 9$. Is the point $(6, 5)$ on the circle? Justify/explain.

Center: _____

Radius: _____

Is $(6, 5)$ on the circle? Y or N

2. Write the equation for the circle with center $(5, -2)$ and with diameter $10\sqrt{3}$. Which one of the three is the correct response: The point $(-3, 2)$ is inside / outside / on the circle with center $(5, -2)$ and diameter $10\sqrt{3}$. Justify/explain.

Equation: _____

3. Write the equation for the circle with endpoints of a diameter $(3, 12)$ and $(-5, 2)$. Hint: Find the center first!
 How many times does this circle intersect with the x -axis? How many times does this circle intersect with the y -axis?

Center: _____

Number of x -intercepts: _____

Number of y -intercepts: _____

Equation: _____

4. What is the focus and the equation of the directrix for $x - 4 = -\frac{1}{12}(y + 1)^2$? How many times does this parabola intersect with the x -axis? the y -axis?

Focus: _____

Directrix: _____

Number of x -intercepts: _____

Number of y -intercepts: _____

5. What is the focus and the equation of the directrix for $(x - 2)^2 = -2(y + 3)$? How many times does this parabola intersect with the x -axis? the y -axis?

Focus: _____

Directrix: _____

Number of x -intercepts: _____

Number of y -intercepts: _____

6. What is the vertex and the equation for the line of symmetry for the parabola $2y^2 - 20y - x + 47 = 0$?

Vertex: _____

Line of Symmetry: _____

[7-8]: Using the distance formula and the definition for parabola, write the equation for each parabola in either Focal Width form or a variation of Vertex/Descriptive form.

Reminders – Focal Width form: $(x - h)^2 = 4c(y - k)$ or $(y - k)^2 = 4c(x - h)$

Vertex/Descriptive form: $y = a(x - h)^2 + k$ or $x = a(y - k)^2 + h$

7. Focus is at $(-5, 0)$ and the equation for the directrix is $x = 5$. Sketch the parabola.

8. Focus is at $(-4, 5)$ and the equation for the directrix is $y = -3$. Sketch the parabola.

[9-10]: Convert to either Focal Width form or a variation of Vertex/Descriptive form. Once you have done this, sketch the parabola, find and graph the focus, directrix, and focal chord endpoints.

9. $4x + 11 = y^2 + 6y$

10. $2x^2 - 4x = 4y - 14$

Parabola Calculation Challenge:

The Golden Gate bridge is a suspension bridge in San Francisco, California. The towers are 1280 meters apart and rise 160 meters above the road. The cable just touches the sides of the road midway between the towers. What is the height of the cable 200 meters from a tower?

1. Sketch the bridge, two towers, and the cable between them on grid paper.
2. Draw a coordinate axis onto your grid so that the origin is at the point where the cable touches the road.
3. Label the points at the top of each tower with the correct coordinates based on the information given in the problem.
4. Use these points to write the equation of the parabola in vertex form. Things to think about:
 - a. Should it be an $x =$ or $y =$ equation?
 - b. Should a be positive or negative?
5. On your graph, mark a point, P , on the roadway 200 meters from the tower. Find the coordinates of that point, based on the information given in the problem.
6. On your graph, mark the point on the cable directly above point P . Things to think about:
 - a. How does point P relate to the question you are trying to answer?
 - b. Which part of the coordinate of P do you already know?
 - c. Discuss the answers to these questions with your partner or group.
7. Use all of the information you have gathered, including the equation you wrote for the parabola made by the cable, to find the height of the cable 200 meters from a tower.

Math 3 Unit 7 Worksheet 2 - Selected Answers

1. Center = (5, 2) & r = 3
2. Center = (-3, -4) & r = 5
3. Center = (4, -1) & r = 2
4. Center = (-2, 7) & r = $2\sqrt{5}$
5. Center = (0, 6) & r = $4\sqrt{3}$
6. Center = (3, -1) & r = $4\sqrt{3}$
7. Center = $\left(\frac{7}{2}, -3\right)$ & r = 7
8. Center = $\left(-1, -\frac{9}{2}\right)$ & r = $2\sqrt{3}$
9. Center = (-4, 0) & r = $\frac{9}{5}$
10. Center = (-6, -2) & r = $5\sqrt{3}$
11. Center = $\left(8, -\frac{5}{2}\right)$ & r = $3\sqrt{5}$
12. Center = $\left(-\frac{11}{2}, 8\right)$ & r = $3\sqrt{7}$
13. Translation: $(x, y) \rightarrow (x + 9, y - 3)$
14. Scale Factor = $\frac{5}{2}$ or 2.5
